OBJECTIVE

The purpose of this 1 day course is to give the participants knowledge and understanding of how to buy, sell and operate vessels in a global commercial environment. We also present the complexity of chartering and operation and the different risks associated with the execution, i.e. legal, and operational risks. We will also introduce various types of charter parties.

TARGET GROUP

The target group for this course is all employees in the shipping industry, those working in related industries, as well as those taking an interest in shipping who are eager to understand the basic and legal aspects of buying, selling and chartering of a vessel. It is our ambition to develop an understanding of the importance of a well-organized chartering and operation for the creation of value to the shipping community. This knowledge is valuable for employees whether they work within ship management, chartering, finance & accounting, or other functions within the maritime industry, such as classification, banking, P&I, insurance, etcetera.
