SHIP MANAGEMENT

Companies – Contracts – Technology - Operations

OBJECTIVE

The purpose of this 1-day course is to give the participants knowledge and understanding of ship management challenges commercially, legally and technically.

We also look at how to ensure safe, efficient, and cost effective performance of a fleet through planned maintenance, purchase and optimization of ships, as well as some operational aspects at sea when managing ships.

TOPICS TO BE DISCUSSED

- Ship management
- Organization
- Operational risks
- ISM-Code /ISO 9001
- New Building Deliveries
- Practical Case Work
- Discussion

TARGET GROUP

The target group for this course is all employees in the shipping industry, those working in related industries, as well as those taking an interest in shipping and who are eager to understand the basic legal aspects of buying, selling and chartering of ships.

Our ambition is to develop an understanding of why commercial, legal and technical knowledge is required when managing ships world-wide. A successful interplay is essential if to achieve safety for property, people and the environment.

This knowledge is valuable for a variety of employees. Whether you work within ship management, chartering, finance & accounting, or other functions within the maritime industry cluster, such as classification, banking, broking, P&I, / H&M-insurance etc.

COURSE RESPONSIBLE & LECTURERS

Mr Tor Erik Jensen is a legal professional and Assistant Professor at the University of South-Eastern Norway (USN) and visiting lecturer at BI Norwegian Business School and abroad.

Mr Christian Hovden is an engineer professional and Assistant professor at USN, with extensive experience from shipping & offshore engineering, shipbuilding, and project management.

*From our beautiful and classy venue at
the Norwegian Shipowners' Association*
